

**Q. What do you do when you have been lied to?**

**A. LEAVE LABOR BLANK**

If you are reading this talk to your neighbours about it. While you are, you could be breathing in the pollutants from the three 15 MW gas fired turbine generators that will produce more than 500,000 kg of exhaust gas per HOUR.

Don't let Labor do this to your quality of life.

- If you suffer from lung conditions - be concerned
- If you are an older person - be concerned
- If you are a child - be concerned

CPRL1 - Lied

**Q. Sick of Stanhope's double standards?**

**A. LEAVE LABOR BLANK**

**Tuggeranong** - Labor wants data storage warehouses supported by a polluting 45 MW power station (24/7 x 3 gas fired turbines) next to homes in the Tuggeranong Valley

**Belconnen** - Labor wants data storage warehouses supported by the national electricity grid (no power station for Stanhope's electorate!)

The Independent Health Impact Assessment Steering Group was sacked because it was:  
- discovering the enormous negative effect it will have on our community  
- probably going to be critical of Labor!

CPRD2 - Double Standards

**Q. Community blamed for losing \$1 billion?**

**A. LEAVE LABOR BLANK**

**Tuggeranong** - Labor wants data storage warehouses supported by a polluting 45 MW power station (24/7 x 3 gas fired turbines) next to homes in the Tuggeranong Valley

When the development was downscaled in May 2008 the Labor government and the developers claim to have been listening to the community's concerns BUT they knew in February 2008 that a 210MW power station was NOT economically viable.

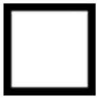

You were blamed for their deception. Do not trust a Labor government.

CPRB3 - Blamed

# LEAVE LABOR BLANK

July 07 Site selected by Stanhope for 'state significant', 2nd power source for the ACT  
Feb 08 Secret internal government documents revealed Stanhope knew the 2nd power source was NOT economically viable  
March 08 Plans filed for 210 MW power station - 2nd power source  
April 08 Community discovers by accident the development exists  
May 08 Chief Minister declares downscaling to equivalent of 3 x gas fired turbines (24/7) - he claimed it was 'due to public concerns'  
June 08 New proposal filed BUT accepted as an alteration  
July 08 Potential critical Independent Health Impact Assessment Steering Group sacked  
August 08 Pro-developer Environment Impact Statement announced.
